EXPERIENCE

Tembeza International, Barcelona — *Lead Developer*

2020 - TODAY

Lead Developer working on an MVP gambling platform for a Kenian client. Based on microservices and developed with Elixir, the platform was designed to be able to handle millions of concurrent transactions.

As a Lead, I collaborated on guiding the future architecture of the platform, shaping the team dynamics and translating the business requirements into technical, prioritized, features to meet expected deadlines.

ThoughtWorks, Barcelona — *Senior Consultant*

2018 - 2020

Project: International Fashion Retailer

Refactored a Java monolith into RESTful microservices with Spring boot framework, helping the team to improve software practices and increase productivity and self-confidence.

Project: International Classifieds Company

Site Reliability Engineer for the observability of microservices in AWS. Building observability automation with AWS serverless lambdas in Python and Golang, integrating with Datadog and OpsGenie.

Ulabox, Barcelona — *Software Engineer*

2015 - 2018

Project lead for the design & development of a mission-critical DDD/CQRS/Event-Sourcing based warehouse management system in PHP7/Symfony3, communicating with other services using RabbitMQ and a REST API.

Also lead the integration effort with Oracle's Netsuite ERP for the products and orders of the company.

Together with some coworkers, I am pushing towards the adoption of agile methodologies and the use of the Scrum framework in the company.

As a side-project, I'm currently exploring the possibilities of Elixir language and voice interaction systems like Alexa.

SKILLS

Experienced with high-traffic and demanding sites.

Result-oriented agile believer and servant leader, rooted in Scrum values.

Fast and avid learner.

Committed and self-organized.

MISC

Teacher, Tutor and Excellence Jury of the High-Performance Web Development Master's Degree, LaSalle University

Higher degree training cycle in cooking management.

Passionate for gastronomy and cooking, I took one year of the HDTC.

LANGUAGES

Native Spanish

Fluent English

Basic Portuguese

Trovit, Barcelona — Software Engineer

2013 - 2015

I started out as a senior PHP Developer in charge of the landing pages and paid traffic, where I refactored the existing code and introduced real-time metrics. I also developed the PHP side of the real-time bidding (RTB) system and banner serving platform, with more than 500 million hits per month. I then joined the Web Team as its lead, introducing best practices like TDD in the team and leading the refactoring effort.

At the same time, I co-founded a couple of side projects in NodeJs and other technologies with some colleagues and collaborated on some open source projects.

Kodekin, Vitoria-Gasteiz — Founder & CEO

2007 - 2013

Founder and CEO of Kodekin, a consulting and tech outsourcing company based on my home town which I run for seven years, with a focus on web development and cultural initiatives.

IBM Global Services, Madrid — Web Lecture Engineer

2006 - 2007

Maintenance of IBM's *Partner World* contents.

Creatta.net, Vitoria-Gasteiz — Full-stack Developer

2005

Full-stack developer for the marketing firm's clients' custom made e-commerce and CMS websites.

Geograma, Vitoria-Gasteiz — Full-stack Developer

2004

I developed a client-facing demo web application of the firm's Geospatial API service and its technical documentation.

EDUCATION

University of the Basque Country — Computer Engineer

I took part in many workshops and community-driven software efforts and worked as a freelance PHP developer for various clients, developing small CMS systems and websites. At the time I was also deeply interested in CPU emulation and developed emulators, decompilers and several other utilities for the Z80 and 6502 CPUs in C language.

LaSalle University — Master's Degree in IT Management

Team and project management with a focus on innovation and

company-wide vision and alignment.

Scrum.org — *Professional Scrum Master (PSMI)*

Lean Kanban University — *Team Kanban Practitioner (TKP)*

ONGOING EDUCATION

University of the Basque Country — *Master's Degree in Intelligent Systems and Computational Engineering*

MSc with a focus on Artificial Intelligence and Big Data

Amazon Web Services — *AWS Certified Solutions Architect*

Axelos — *ITILv3 Foundation*
